The DPE Initiative

Broadsage is a Developer Platform Engineering (DPE) initiative built to deliver panoramic vision and wise guidance, bridging open-source innovation with hardened, resilient enterprise architectures.

All marks, color ratios, and typography specifications in this manual are locked to preserve universal consistency. Never distort, alter, or disassemble these core identity assets.

Open-Source Hardening & Governance

Upstream Innovation -> Enterprise-Grade Resilience

Curating, auditing, and hardening distributed open-source stacks. Eliminating security vulnerabilities and compliance liabilities so enterprises can build freely without vendor lock-in.

Autonomous Agentic Workflows

Intelligent Developer Loops & Multi-Agent Swarms

Embedding autonomous AI review agents, LLM reasoning meshes, and automated migration assistants directly into developer CI/CD pipelines to accelerate engineering velocity.

Unified Telemetry & Lakehouse

Real-Time Developer & System Observability

ClickHouse-powered high-throughput metrics and trace streaming. Tracking DORA metrics, build latencies, and platform health across the entire distributed developer lifecycle.

Paved Roads & Developer Toolchains

Frictionless Self-Service & Local Runtimes

Open-source developer CLI runtimes, standardized project scaffolds, and self-service cloud environments that eliminate cognitive load and establish trusted golden paths for every team.
